IMPORTANT DISCLOSURES

Risk Considerations

There is no assurance that a separately managed account will achieve its investment objective. Separately managed accounts are subject to market risk, which is the possibility that the market values of securities owned will decline and that the value of the shares may therefore be less than what you paid for them. Accordingly, you can lose money investing in a separately managed account. Please be aware that this strategy may be subject to certain additional risks.

Equity. In general equity securities' values also fluctuate in response to activities specific to a company.

Concentration. The strategy may also focus its investments on certain industries and/or sectors, thereby increasing its vulnerability to any single industry/sector or regulatory development. As a result, the strategy's returns may be considerably more volatile.

There is no guarantee that any investment strategy will work under all market conditions, and each investor should evaluate their ability to invest for the long-term, especially during periods of downturn in the market. A separately managed account may not be suitable for all investors. Please consider the investment objectives,

risks and fees of the strategy carefully before investing. A minimum asset level is required. For important information about the investment manager, please refer to Form ADV Part 2.

Separate accounts managed according to the Strategy include a number of securities and will not necessarily track the performance of any index. This material does not constitute an offer to buy or sell any financial instrument or to participate in any trading strategy.
